

Numbers—The Powerful Bridge Beyond

Chaldean Numerology for the New Millennium

Author's Story

Joanne Justis
Chaldean Master Numerologist
Principal, NumbersRU.com

This book is truly a miracle and a labor of love for me. It's the personal story behind its origin, and the collaborated efforts of two Master Numerologists who dared to write the untold story of Chaldean Numerology so that we could share our findings and work with the world. Our book is based on discoveries, studies, and stories of real people. It is written to take Numerology to higher levels of understanding and accuracy, and to dispel misinterpretations falsely perpetrated throughout history about the science of numbers.

My story begins in the 1980s when my mother, Betty Gibson, discovered Numerology in her search for knowledge and truth. She wanted to know whether life's experiences were attracted to us, or happened at random. This journey took her first to studying "Modern" Numerology and then to developing her Numerology charts based on that system.

She soon discovered that the Modern system was inaccurate (based on consultation feedback through her readings), but was not willing to walk away from years of work because of this discovery and her disappointment. She was, in fact, determined to solve the mystery in finding the number system that was most accurate regardless of what the popular consensus was for using the Western system.

Through more research and in time, my mother was introduced to Chaldean Numerology through a book titled *Numerology Made Easy* and written by W. Mykian, a Master Numerologist

Numbers—The Powerful Bridge Beyond

Chaldean Numerology for the New Millennium

using the Chaldean number system. After learning that the formula for the Chaldean number system was based on sound and phonics versus the Western system that is based on the Western alphabet, my mother knew she had solved the mystery as to which system was more accurate. Upon mastering the science of Chaldean Numerology, she developed a computer software program to ensure the accuracy of her charts. From 1984 into the new millennium, my mother gifted charts to people seeking guidance and clarity in their lives.

During the years that my mother devoted herself to her work, W. Mykian was always a part of our life, but of course he never knew this. His book was the only reference material we referred to since he was the known authority on Chaldean Numerology. His book detailed the instructions on how to calculate all aspects of Numerology. We always talked about meeting him one day but little did we know that would not come about until years later and under unexpected new circumstances.

My mother hoped that her work would be preserved by a family member since she had made many independent discoveries over the years based on feedback from research, case studies, and actual readings. My mother's coaching and teaching of the art of Numerology interpretation allowed me to naturally and smoothly take the baton that she passed to me.

Due to circumstances and events that happened beyond my mother's control, she had to set aside her dream of perfecting her computer software program for many years. But once the baton was passed to me, we began reconstruction of the formulas and enhancements she used in her original program, as well as totally having to rewrite the entire material content for this new computer software program.

This was a more difficult task than at first appearance. Reviewing and interpreting my mother's original documentation was a test of character and I was unsure we could succeed identifying and verifying all of the formulas and enhancements that my mother had incorporated in her original program. The process was arduous. But finally, our goal was accomplished. The formulas and specifications were ready for developing the computer software program. My programmer, using the latest technologies available, designed a one-of-a-kind, state-of-the-art, sophisticated computer software program that has the ability to calculate dates between 1900 and 3004, a span of well over one thousand years.

While my computer software program was being completed, I was also finalizing the content and design of my Web site. As soon as that was finished, I sent a letter to W. Mykian letting him know I was carrying on my mother's work and wanted his approval to use his name and work on my Web site. His approval led us to eventually communicating full-time, and finally, meeting for the first time. The rest of the story is the book. We have now combined forces to write our book, *Numbers—The Powerful Bridge Beyond: Chaldean Numerology for the New Millennium* (The Definitive Word on Numerology) to set the history records straight and to share the correct system of numbers with the world.

Numbers—The Powerful Bridge Beyond

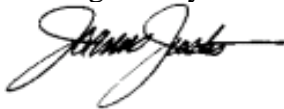

Chaldean Numerology for the New Millennium

I would like to acknowledge William Mykian for his major contribution as a Master Numerologist as well as being a “brilliant” historian who researched the records of history in order to bring you the most factual details available today on Numerology and for his devotion in working with me to produce this book so others could benefit from our work. I will always be deeply grateful to William for the opportunity of co-authoring our book and probably many more to come—but especially for his friendship, knowledge, and guidance along our journey together to bring you the most complete book on the accuracy of Chaldean Numerology.

A special thanks goes to my family for their encouragement and loving support. First, there is my mother, Betty Gibson, who was way beyond her time in paving the road for advancing Chaldean Numerology and laying the foundation for making my work and my writing of this book possible. Next, I am thankful to my sisters, Gwen, Karen, and Patti Justis for our close and unique relationships with each other and to my twin sons, Charles and Stephen Endweiss, whose birth groomed me in such a special way that would eventually lead me to pursuing my work as a Master Numerologist and fulfilling my dreams in the second half of my life. Most especially, I give my thanks in honor of the glory of our Spanish ancestors. And, special thanks also go out to my many friends who have always been supportive of my work.

I am grateful to all of those wonderful people along the way, who know who they are, who allowed me to demonstrate my charts and readings, and to my clients who have trusted me with their personal stories which allowed me, through their experiences, to bring Numerology to new levels way beyond, beyond.

Wishing all of you the very best that life has to offer.
