

Numbers–The Powerful Bridge Beyond

Chaldean Numerology for the New Millennium

Author's Story

William Mykian
Chaldean Master Numerologist
Author, *Numerology Made Easy*

The Universe has blessed me with an opportunity to participate in the writing of a very unique and important book, *Numbers–The Powerful Bridge Beyond: Chaldean Numerology for the New Millennium*. When I wrote *Numerology Made Easy*, I wasn't aware, at that time, that it was the first book that had ever been written to include formulas, calculations, and explanations of a very unique and very accurate system of Numbers, called Chaldean Numerology. It was accurate at its beginnings circa 4,000 BCE, or earlier. It is still accurate and has always been the only accurate system of numbers.

Prior to my discovering Chaldean Numerology, and to the publication of *Numerology Made Easy*, I had reached a frustrating impasse trying to get accurate results from what was called Modern or Western Numerology, particularly when it came to interpreting the patterns of Names. I was at a loss as to how to resolve the inaccuracies in Modern Numerology's treatment of Names. In my search, I was led to two books which introduced me to what was called Chaldean Numerology. One book was titled *Numbers Will Tell* written by Gerun Moore, a student of Count Louis Hamon. Count Louis Hamon, who was known as Cheiro, wrote a book titled *Cheiro's Book of Numbers*. Once I read and studied these books describing Chaldean Numerology, an ancient system of numbers, I tested the claims and results with clients whom I had already worked with using the Modern system of numbers. What I learned gave me the keys to determining the true

design and blueprint of one's life experiences. I discovered that the story of Chaldean Numerology was also *the* true story of Numerology.

In 1984, I received a letter from Betty Gibson, a Numerologist from California informing me that after many years of being misled by the so-called Modern system of numbers, she had come to realize that the science of Chaldean Numerology as discussed and revealed in *Numerology Made Easy* was the true science of numbers. She was developing a Chaldean Numerology computer software program, and asked to use *Numerology Made Easy* as a basis for her program which also included her enhancements and new discoveries. We then communicated for a few years, but by 1990 we lost touch. Now, here's the rest of the story.

In 2003, I received an interesting e-mail from someone named Joanne Justis. At that time, I had no idea whatsoever who she was, and was surprised to find out that she was the daughter of Betty Gibson, as Betty and I had never discussed our families at all. Joanne was in the process of rewriting and upgrading the computer software program that her mother had developed almost 20 years before, and had written to ask me for confirmation of permission to use my book as a reference along with her work.

At the same time, Joanne was developing the content and design of her Web site (NumbersRU.com), which has turned out to be one of the most unique, profound, and important developments in Numerology, today. The software, which generates her Web site's Numerology charts, contains everything one needs to "see" their life's design and blueprint. While Joanne was finishing her Web site, I was considering a follow-on book to *Numerology Made Easy*, but was unsure as to the feasibility of undertaking such a project.

As the months rolled by, Joanne and I communicated more and more to discuss how to improve the accuracy of the charts, and investigate ways to enhance the methodologies and techniques to utilize Numerology to its fullest potential. I finally realized that the best possible follow-on book could only come about if we both wrote it. In late 2004, we decided to co-author a new and exciting book about Chaldean Numerology. The rest is now history. I am privileged and honored to have worked with Joanne's mother Betty, and to be co-authoring this book with Joanne, a Master Numerologist extraordinaire. Joanne is a brilliant and cognitive Master Numerologist who has an intuitive understanding and insight into the Language of Numbers and its connection to us and the world around us.

For most of my life, I have been naturally attracted to numbers, philosophy, and spiritual studies. As my experience with numbers grew, I sensed a "link" between mathematics and philosophy, and numbers and language, that would, I felt, open doors to new avenues of knowledge and understanding about our lives and our world. On my path, I have made a commitment to the continued study and practice of Metaphysical and Spiritual disciplines. I graduated from Penn State University with majors in Mathematics and Philosophy. In addition to Numerology, my career has ranged from business, financial, and performance management to nutritional therapy and political consulting.

I am deeply thankful to my loving family—my daughters Cathlene, a "Master" healer in her own right, and Indeia Anne, whose own success will be greater than she realizes, and to my son Joshua, for his loving soul and intuitive heart. Also, I thank my longtime friend Cynthia, whose compassionate heart tolerated me while I was discovering what life was all about, including unconditional love. And, I thank all who

have crossed my path, who were excited and encouraging about the work I was undertaking, and honored the path that I chose to walk upon.

Joanne and I believe that this book will greatly benefit people who want to live their lives smarter and better. They will be amazed by the incredible accuracy of Chaldean Numerology and the potential for understanding themselves, their path in life, and the things that matter most to them, as well as building a lifetime of informed choices, intelligent decisions, and right action.

A handwritten signature in black ink, appearing to read "William Mykian". The signature is fluid and cursive, with a prominent initial "W" and a long, sweeping underline.
